Lymphedema Sleeve and/or Gauntlet Care Instructions

The lymphedema sleeve and/or gauntlet are used for everyday use. You will want to put them on in the morning when you first wake up. This will help prevent the swelling through-out the day. Check for irritation and/or redness when you take them off to ensure no concerns/problems.

I have received and reviewed the manufacturers wear and care instructions from:

Juzo

Sigvaris

Jobst

Mediven

- Hand washing is recommended, but you may machine wash on the gentle cycle with garment turned inside out.
- Use lukewarm water and a mild detergent. To protect the garment during washing, we recommend turning the garment inside out before washing.
- Do NOT use bleach or fabric softeners.
- Rinse well and AIR-DRY. (AVOID tumble drying.)

*If there are any problems or concerns please follow up with your practitioner.
